Male patients transferred to Colorado State Penitentiary for safekeeping												27
GRAND TOTAL												4,820

More patients were admitted during the last biennium than in any similar period in the history of the hospital, the number of admissions being 1,539. The separations totaled 1,313, of whom 682 patients were discharged while 631 patients died. The net gain in the patient population was, therefor, 226. The number of patients released on parole was 1,135 while during the period 678 patients were returned from parole. More patients were granted freedom of the grounds, consequently the number who escaped was slightly greater than in previous periods. Many of these just wandered off and were returned within a few days, thus as a result the net loss from escapes was less than formerly. Because of the marked shortage of male employees in the Nursing Department, twenty-seven custodial men patients, considered dangerous to be at large, were transferred to the Colorado State Penitentiary at Canon City, Colorado, for "safekeeping". They will be kept there for the "duration" or until such time as sufficient employees can be obtained to properly care for them at this institution. These patients are visited at regular intervals by a physician from the hospital and are returned here whenever further hospitalization is indicated.

MEDICAL REPORT

Despite the loss of trained personnel in all departments of the hospital, every effort has been made to keep the standard of care and treatment afforded the individual patient at a high level. Many of the activities of the institution have had to be curtailed while others have had to be discontinued for the duration. In some instances, however, certain advances have been made. Electric "shock" has been added to the methods of producing "shock therapy" and although insulin and metrazol are still used in certain cases, the former has become the procedure of choice. Fluoroscopy of the chest has been made routine in the examination of all new patients and as a result many asymptomatic disease conditions have been discovered. Segregation of patients with Diabetes mellitus has been accomplished and these are now fed from individual trays prepared in the diet kitchen. Two additional wards have been made available for continuous treatment, one for female and the other for male patients, and an occupational therapy unit has been installed in each. The scope of occupational therapy throughout the hospital has been extended and a registered therapeutist has been placed in charge of the department. A social service unit has been established under the direction of a trained psychiatric worker. A unit for teaching psychiatric nursing has been instituted in cooperation with the University of Colorado and to date 85 students from various hospitals in this region have received training. The hospitals from which students have been sent are: The Presbyterian Hospital and the Denver General Hospital of Denver, Colorado; the Beth-El Hospital and the Seton School of Nursing of Colorado Springs, Colorado; the Parkview Hospital of Pueblo, Colorado; the Mercy Hospital of Durango, Colorado; the New-

man Hospital of Emporia, Kansas, and the Sheridan Memorial Hospital of Sheridan, Wyoming. Plans have been completed with the American Dietetic Association to provide a twelve month dietetic internship for a limited number of student dietitians. Due to the inability to obtain qualified students, the training courses for psychiatric aides and for apprentice cooks have had to be discontinued for the duration.

In the Clinical and Pathological Laboratory, the amount of the work has increased and a total of 154 autopsies was performed. In each case complete pathological studies were completed. Both national and state recognition was brought to the hospital by this department. The American Society of Medical Technologists awarded the first prize medal in 1943 to Lois Gallaher, M.T., and Pauline Kurachi, M.T., for their paper on "The Use of the Chick Embryo in a Hospital Laboratory", while the Colorado Society of Medical Technologists gave the first prize cup in 1943 to Pauline Kurachi, M.T., and Ruth Herzberger, M.T., for their exhibit "Routine Brain Study in the Clinical Laboratory of the Colorado State Hospital." In 1942 national recognition was given the Colorado State Hospital for the "Observance of National Hospital Day" when granted the first prize plaque by the American Hospital Association. This recognition was doubly gratifying when it was ascertained that a mental hospital received the award for the first time in the history of the Association. Due to the paper shortage all tables relating to the activities of the Medical Department have been omitted in this report.

BUILDING PROGRAM

The dormitory erected on the site of the old female center building was occupied in May of 1942. Plans for another structure to house female patients were completed but because of federal regulation of building materials, bids were never taken. No new construction is contemplated until such time as materials are again available.

SPECIAL APPROPRIATIONS RECEIVED

Maintenance Fiscal Period 1941-1943, $1,750,000. This amount was insufficient to pay the costs of operation for the biennium, consequently it was necessary for the legislature to make a deficiency appropriation of $222,618.80, to meet current expenses of the institution. The total amount of money appropriated for the fiscal period was, therefore, $1,972,618.80.

MAINTENANCE FISCAL PERIOD 1943-1945, $2,100,000

With all operating costs increasing it appears inevitable that a deficit will occur before the end of the biennium. No estimate of the deficiency can be made because no one can anticipate when the rising prices will halt.

CHANGES IN PERSONNEL

Appointments to the Medical Staff: Dr. Gwen R. McCullough, August 15, 1941; Dr. Mary Linda Gorton, October 6, 1941; Dr. Merriman Hamblin, November 4, 1941; Dr. William A. ACKNOWLEDGMENTS

To the officers and employees of the Colorado State Hospital, to the physicians and surgeons of the consulting staff and to Governor John C. Vivian, I wish to express my gratitude for the cooperation and assistance extended me in the conduct of the institution.

F. H. ZIMMERMAN, M.D.,
Superintendent.

Colo. State Department Public Welfare Library

DR. F. H. ZIMMERMAN, Superintendent,
Colorado State Hospital,
Pueblo, Colorado.
Dear Sir:

I submit herewith a report of the business department of the institution for the biennium beginning July 1, 1941, and ending June 30, 1943.

Tables numbers 1 to 9, inclusive, relate to finances. Tables number 10 to 15, inclusive, cover the operations of various departments.

It will be noted that the per capita cost is higher than any previous period. This is principally due to increases in the cost of personal services and commodities.

Respectfully submitted,
CHARLES G. DOWLING, Steward,
Colorado State Hospital.
